Summary

Results-driven Software Engineer with 2 years of experience developing applications for local and international organizations. Skilled in Java, PHP (MVC architectures), React, and NestJS, with a strong focus on building efficient and scalable software solutions. Highly proficient in leveraging AI tools such as ChatGPT, Claude and GitHub Copilot to accelerate development, improve code quality, and enhance problem-solving. Passionate about innovation, continuous learning, and delivering impactful software.

EXPERIENCE

MediTech Data International (MDi) Inc

February 2025 - Present

Junior Developer – Full-Stack Web Applications

910 South Sunset Ave, West Covina, CA, 91790, USA

- **Technologies:** React, NestJS, GitHub, MySQL
- Developed frontends with React and backends with NestJS, managing MySQL databases.
- Collaborated via GitHub and contributed to scalable systems, APIs, and production applications.
- Projects directly involved: TBT (Text Based Ticketing) System, BML (Buy My Lunch – a platform connecting schools, parents, and restaurants to distribute meals to students), Cubical Project (Employee rental/management system).

Freelance Software Developer & Digital Media Creator

January 2023 – Present

Self-Employed

- **Technologies:** React, NestJS, PHP, AI Tools, GitHub, MySQL
- Developed custom web applications with frontend and backend integration.
- Created AI-generated promotional videos. (e.g., Honeymoon Resort - Badulla)
- Delivered digital marketing solutions for projects (e.g., Yugathra film).
- Managed client requirements and end-to-end project delivery.

Inntri Labs Pvt Ltd

February 2024 - August 2024

Full Stack Developer - Intern

Colombo, Sri Lanka

- **Technologies:** React, SpringBoot, GitHub, MySQL
- Completed a six-month internship as a full-stack developer.
- Gained expertise in MVC architecture and efficiently handled database CRUD operations while developing the frontend with ReactJS and TypeScript.
- Projects directly involved: Factory, Transport, Warehouse.

Axcertro Pvt Ltd

August 2023 - February 2024

Full Stack Developer - Intern

Sooriyawewa, Sri Lanka

- **Technologies:** React, PHP, Laravel, GitHub, MySQL
- Completed a six-month internship as a full-stack developer.
- Utilized Laravel for backend development and implemented the frontend using React, TypeScript, and Tailwind CSS.
- Gained expertise in MVC architecture and database CRUD operations.
- Projects directly involved: BrothersTech, Travel Agencies, Lakforex.

EDUCATION

Informatics Institute of Technology (IIT)

September 2021 - August 2025

Bachelor of Engineering (Hons) in Software Engineering

Rahula College, Matara

October 2020

G.C.E Advanced Level

- **Stream :** Physical Science

TECHNICAL SKILLS

Languages: Java, Type script, PHP, Python, Java script

Back-end frameworks and libraries: NestJS, Laravel, Spring boot

Front-end frameworks and libraries: React, NextJs, Tailwind CSS, Material UI, Shadcn, Bootstrap

Databases: MySQL

Tools & DevOps: : GIT (Github, Gitlab) , Docker

AI Tools: ChatGPT, GitHub Copilot, Claude

PROJECTS

TBT (Text Based Ticketing) System

Technologies: React, NestJS, TypeScript, MySQL, Sequelize, AWS S3, JWT, Swagger/OpenAPI

- This project was completed for MediTech Data International (MDi) Inc.
- Developed a full-stack ticketing/support management system with secure authentication, team-based workflows, and file attachment handling.
- Implemented a database-driven ACL system (RBAC + permissions) with route and method-level access control, including dynamic route support.
- Built admin APIs and seed scripts to manage roles and permissions efficiently.
- Utilized an AI coding assistant for requirements clarification, code generation, debugging, and reviews while maintaining full ownership of development and delivery.

Boardima.com Web Application (Boardima.com)

Technologies: PHP, JavaScript, CSS, MySQL, AI Tools (ChatGPT, GitHub Copilot)

- Developed a property listing web platform with two collaborators where users can find boarding houses, apartments, and lands.
- Implemented core features including property listings, search functionality, and user-friendly navigation for browsing available properties.
- Utilized AI-assisted development tools such as ChatGPT and GitHub Copilot to accelerate development, generate code suggestions, and improve problem solving during implementation.
- Contributed to frontend and backend development using PHP, JavaScript, and CSS.

Point of Sale System with AI

Technologies: React, Spring Boot, Java, MySQL, Python, Machine Learning

- Final year project focused on intelligent retail management.
- Developed a POS system to optimize sales transactions and inventory management.
- Integrated machine learning models for sales forecasting and inventory predictions with real-time updates across Admin, Cashier, and Inventory panels.

ACHIEVEMENTS

- **CODECON 3.0 2023 - Finalist** - Inter-University hackathon organized by the IEEE Student Branch of the Sri Lanka Institute of Information Technology (SLIIT).
- **Duothan 3.0 2023** - Inter-University hackathon organized by the IEEE Student Branch of the National School of Business Management (NSBM).
